January 2006

HIPAA Compliance Policy Management

OVERVIEW:

Developing a messaging infrastructure to help address HIPAA compliance is a difficult challenge. This isn't exclusive to healthcare entities; any organization that sends or receives Personal Health Information (PHI) is subject to compliance legislation. Sendmail's HIPAA Compliance Policy Management service is endorsed by the American Hospital Association (AHA) and features a pre-built lexicon designed to create policies to enable HIPAA compliance. Proven at over 1,000 enterprise implementations, Sendmail Professional Services provide a knowledgebase unrivaled in the industry.

DESCRIPTION:

Delivery and integration of HIPAA lexicons into Mailstream Manager and implementation of specific policies to enable content scanning for Personal Health Information (PHI).

SYMPTOM:

HIPAA regulations dictate that organizations that send or receive PHI must scan their content.

MILESTONE:

HIPAA lexicons and policies installed and tested.

DELIVERABLES:

Sendmail Professional Services will install the HIPAA lexicons and set up initial policies for content scanning, filtering and quarantine. Validate results.

BENEFIT:

Sendmail provides a HIPAA lexicon that has been approved by the American Hospital Association (AHA) for use with HIPAA compliance. This service allows organizations to quickly adhere to HIPAA compliance directives.

PREREQUISITE:

Mailstream Manager
